

SMALL MACHINE BIG POWER

THE FUTURE OF TRAIN CLEANING

HIGH SPEED PERFORMANCE
DESIGNED FOR THE RAIL INDUSTRY.

EXTERIOR TRAIN CLEANING

PROWASH the portable solution for high performance deep cleaning. The 360rpm motor delivers outstanding cleaning results, making light work of heavily soiled surfaces.

- Drastically cuts exhaustive manual labour**
- Saves chemical cost** (spray only when needed)
- 'Like new' cleaning results**

NOSE END

Faster, cleaner and easier nose end cleaning.

THE ULTIMATE ALL WEATHER CLEANING MACHINE

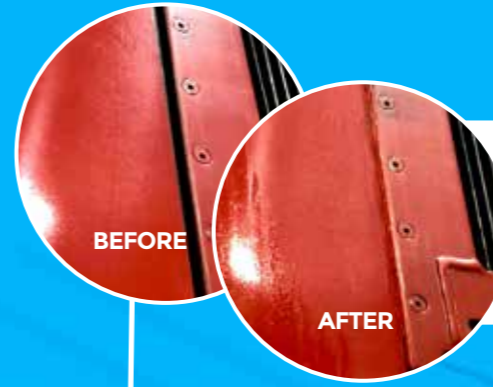

Waterproof, weatherproof and rustproof.

With its stainless steel, skeleton chassis and puncture proof wheels, the **PROWASH** makes light work of manoeuvring over train tracks and steps.

DETAIL CLEANING

Perfect for the harder to clean areas, normally missed by manual methods or using a large train wash.

TRAIN STEPS

Releases engrained grime from textured safety steps.

SIDE OF TRAIN

Quickly and easily removes brake dust and hydraulic fluid.

INSECT REMOVAL

Powerful 360rpm, easily removes stubborn insect build up.

INTERIOR TRAIN CLEANING

JET gives you the freedom to deep clean anywhere. The built in chemical injection provides solution only when you need it, increasing the cleaning speed and performance.

-  Cleans 4x faster than manual methods
-  Zero chemical waste
-  Cleans where no other machine can
-  Vastly improved cleaning results

THE MACHINE FOR ALL THE HARD TO REACH AREAS

JET is specifically designed to deep clean all those difficult to reach areas.

- Underneath seating
- Around table legs
- Around the toilet/sink area

DRY AS YOU SCRUB, WITH THE SUCTION KIT

Simply attach to any wet vacuum, using the Universal Hose Adapter.

The 2 in 1 blade and ultrafibre system.

Either blade the dirt into the floor drain or dry with the ultrafibre.

The blade gives super high pressure on the ultrafibre, for superior daily cleaning.

Blade Vs. standard flat mops:

- 1 double sided blade ultrafibre cleans 4x more surface area.
- Blade gives 10x higher pressure on the ultrafibre, resulting in cleaner floors.
- 30% faster cleaning time.
- Precision edge cleaning.
- 80% laundry savings.

OVERHEAD POWER LINES?
Upgrade to glass fibre, none conductive poles.
